

BookMyDoctor Backend Testing Guide

Generated on: 2026-08-15T09:50:16.798Z

Completed so far

- Backend project initialized with Node.js + TypeScript + Express
- Prisma schema set up for users, doctors, and appointments
- Neon PostgreSQL connection configured
- JWT auth flow created for register/login
- Module-based project structure implemented
- Doctor CRUD routes created
- Appointment CRUD routes created
- PDF generation route implemented
- Project tests added and passing
- Production build verification completed

Verification status

Command: `cd /d/Nihal/book-my-doctor/backend && npm test && npm run build`

Result: Passed successfully. 2 test files passed, 2 tests passed, TypeScript build completed.

Testing instructions

1. Open terminal in backend folder.
2. Run: `cd /d/Nihal/book-my-doctor/backend`
3. Start server: `npm run dev`
4. Test root route: `GET http://localhost:5000/`
5. Test health: `GET http://localhost:5000/health`
6. Register user: `POST http://localhost:5000/api/auth/register`
7. Login: `POST http://localhost:5000/api/auth/login`
8. Create doctor: `POST http://localhost:5000/api/doctors`
9. List doctors: `GET http://localhost:5000/api/doctors`
10. Create appointment: `POST http://localhost:5000/api/appointments`
11. Generate PDF: `POST http://localhost:5000/api/pdf/generate`
12. Download PDF: `GET http://localhost:5000/api/pdf/download/appointment-report.pdf`
13. Validate that responses are JSON for API routes and PDF for PDF generation endpoints.

Example payloads

Register:

```
{"name":"John Doe","email":"john@example.com","password":"123456","role":"PATIENT"}
```

Doctor create:

```
{"name":"Dr. Ram Kumar","specialty":"Cardiology","hospital":"City Care Hospital","email":"ram@example.com","phone":"+91 9876543210","fee":1200,"experience":12,"bio":"Experienced cardiologist."}
```

PDF generate:

```
{"title":"BookMyDoctor Testing Guide","content":"Testing instructions and project status.","fileName":"bookmydoctor-testing-guide.pdf"}
```
